MANTRA: Become the ultimate developer that provides functional user interfaces by merging applied knowledge gained as a coding student at ACA and the analytical skills gained as an accountant.

SKILLS/QUALIFICATIONS:

- JavaScript (including ES6)
- Reactjs and React Native
- Node.js
- Express
- SQL
- MongoDB
- TypeScript
- HTML/CSS

- Advanced Microsoft Excel - complex formulas, pivots, v-lookups, and macros
- Analytical, with exceptional attention to detail
- Independent self-starter, while still able to function proficiently as a member of a team
- Debugging front-end and back-end JS apps
- User Dashboard contributor

EDUCATION:

Austin Coding Academy — August 2017 - July 2018 (currently enrolled)
Mississippi State University, Bachelor of Accountancy, Cum Laude — April 2011

EXPERIENCE:

Whole Foods Market Global Support Office
Margin & Inventory Senior Accounting Analyst

Austin, Texas
September 2016 – Present

Responsible for identifying various ways to streamline and improve accounting processes. I have built VBA Excel based applications, PowerShell scripts, and SharePoint sites. Other enhancements come from partnering with internal developers to communicate business requirements for application enhancements and creation.

Whole Foods Market Global Support Office
Margin & Inventory Staff Accountant

Austin, Texas
December 2013 – September 2016

Provided support to twelve regions for all inventory accounting needs. During this time, I was able to gain access to two databases containing our inventory data and taught myself how to write SQL to obtain reports for our business partners.

Office of the State Auditor (OSA)
Field Auditor I

Jackson, Mississippi
December 2011 – December 2013:

Performed various state and federal mandated government agency audits to ensure compliance with applicable financial laws. Here I found the need to improved and enhance a person's life through technology by writing my first Excel macro.
